TECHNICAL SKILLS

Proficient: Html, Css, Scss, Sass, Tailwind.Css, Bootstrap, React.js, JavaScript, MongoDb, Redux-toolkit

Competent: TypeScript, Next.Js, React Query , React useForm, FormData, Style component ,Vue.js, axios

Familiar : Ant design, tailblocks, appwright, npm libraries, tilda, useForm

ACTIVITIES

Volunteer

- I worked as an assistant mentor at PDP Academy, where I guided 25 students through their projects and helped them grasp key programming concepts.

Fast-Food

- We made the Pdp application project in React.js and using additional libraries
- We automated the build, test, and deployment processes. We frequently deployed small, manageable changes.
- We worked as a core team in the PDP Academy practicum project, which included four backend programmers, UI designers, and five frontend programmers.

WORK EXPERIENCE

Teplodom

- User Experience: I learned Redux Toolkit, secret routes, and code optimization.
- Designed dynamic pages using Tailwind.Css,React.js

Promptopia

- A full-stack web application made in Next.js with mongodb.
- Using NextAuth, user authorization registered through Google helps prevent CSRF (Cross-Site Request Forgery) attacks by hackers.

Fast-pizza

- My order pizza project was made with React , FormData Redux-toolkit and others libraries.
- Handling API requests (via pre-rendering) through React Router helped get your project up and running in seconds.

Cinema

- This site has 24 genres of search system, 3 different categories of movies, cartoons, series
- Technologies I used I used tailwind css to style React.js I used react-router-dom

Quiz-app

- **React**: Developed dynamic UI, managed state, implemented navigation.
- **CSS**: Created responsive design, styled with modern techniques.

Personal Skills

Self-Learning: I am highly motivated and proactive in learning new skills and acquiring knowledge independently, ensuring that I stay updated and competent in my field.
